

2018 KENNETH HAMMOND LECTURE & SPRING SUSTAINABILITY SYMPOSIUM

CREATING ENVIRONMENTALLY SUSTAINABLE URBAN ENVIRONMENTS

The United Nations projects that 66% of people globally will live in cities by 2050. Urban centers in Southern Ontario are growing rapidly and this presents a critical opportunity for city planners to change the way we build and develop. What are the challenges and how can we overcome them to make urban environments more resilient and sustainable? Please join us for the annual Hammond Lecture and panel discussion on creating a resilient world – the new path to sustainability. Bring your questions!

Keynote Speaker

Jane Welsh
