

**Application Documents Required for  
ENVS 4260 Field Entomology 2020  
Location: Costa Rica**

Please submit the following documents to Dr. Cynthia Scott-Dupree ([cscottdu@uoguelph.ca](mailto:cscottdu@uoguelph.ca)) by **November 1, 2019**. Scans or Docx files submitted digitally are preferred. Please ensure your student number is included on all documents you submit. Make sure your name appears in the file name for all digital files submitted.

- 1) 2-page description of the importance of entomology, taxonomy, systematics, biodiversity and field research protocol in your academic and future professional career. I **do not want** this to be a stream of consciousness - please reflect on the message you want to send me and make me understand why it is important for you to participate in this course. Please indicate whether you plan on pursuing a graduate degree.
- 2) Unofficial transcript that clearly indicates you have the prerequisite course (also the marks you obtained) for this course: 3 or more courses in biological sciences; ENVS 3090 or equivalent encouraged.
- 3) Picture of yourself - this is simply for my files so I can put a face to a name.

I will look through all the material provided by all applicants and then arrange interviews with those short listed to confirm the final selection. Please realize competition will be stiff for the 15 student spots we have in the course and there are no guarantees you will be accepted.

Sincerely

Cynthia Scott-Dupree
