**SEMINAR TITLE:**

Romancing the Stones and Tracking the Bones:  
Climate Clues and Breaking News from Stable  
Isotopes.

**SPEAKER'S NAME:** Fred Longstaffe

**DATE:** February 13, 2015

**PLACE:** Alexander Hall 218

**ABOUT THE SPEAKER:**

Dr. Fred Longstaffe is a distinguished University Professor and Canada Research Chair in stable isotope science. He received his PhD from McMaster University in 1978 and established the Stable Isotope Laboratory at Western University. His research interests include stable isotope geology and ecology, heavy oil deposits, and environmental geochemistry. He has received various awards for his research contributions.
