

Short-rotation Woody Crop Systems Development Field Day

The University of Guelph invites you to attend a practical and informative field exhibition showcasing high-yield afforestation, biomass production and agroforestry management regimes, operational practices, commercial harvesting technologies, and climate change adaptation options.

Save the Date!

Thursday, November 5, 2015

10 AM to 4 PM

Held at The Guelph Turfgrass
Institute (GTI), 328 Victoria Road
South, Guelph (enter through the GTI entrance off Victoria Road)

"Short-rotation woody crops, high-yielding afforestation, and agroforestry land-use systems are excellent carbon sinks and they produce fibre and biomass contributing to the forestry, bioenergy, and bioproduct industries in Canada."

Join us for practical presentations/exhibits by researchers, developers, and biomass specialists showcasing:

- ✓ Various Biomass Options
- ✓ Short Rotation Woody Crop Options
- ✓ Establishment and Management Options
- ✓ Growth and Yield
- ✓ Climate Change Adaptation Options
- ✓ Harvesting Demonstrations
- ✓ Biomass Product Options
- ✓ Supply Chain Analysis
- ✓ Research Presentations
